

QUALITY and ENVIRONMENTAL POLICY

Principles:

- We are committed to the provision of Fabrication, Cutting, Packing, Assembly, Warehousing and Resale of Aluminium Products
- We aim to achieve and sustain a reputation for quality products and services at prices which are competitive.
- We recognise that our activities result in both direct and indirect impacts on the environment.
- We are committed to minimising the impact of our operations on the environment by means of a programme of pollution prevention and protection of the environment whilst ensuring continuous improvement in our environmental performance.
- We are committed to maintaining a Quality and Environmental Management System, which meets the requirements of ISO 9001:2015 and ISO14001:2015 and retain status as a registered firm of assessed capability.

Intentions:

- To provide products and services that are fit for purpose and completely meet and where possible exceed our customers' requirements.
- To encourage the involvement of our staff in matters which have a bearing on quality or an impact on the environment and for the staff to accept responsibility for maintaining, and where possible, improving the quality of products and/or services within the scope of their function whilst reducing their environmental impact.
- To implement waste management and environmental best practice where applicable by minimising the amount of waste disposed of by;
 - recovery through re-use or recycling as much as is economically practicable and ensuring that the remainder is disposed of properly.
- minimising the use of energy, water and other materials through monitoring and increasing the efficiency of use.
- To comply with all relevant legislation and regulations, and with all other codes of practice and industrial standards to which we subscribe, including ISO 9001:2015 and ISO 14001:2015.
- To operate a programme of continuous improvement, which ensures that the policies and objectives we have outlined are achieved.
- To set environmental and quality objectives and targets, with KPIs and to implement an action plan, addressing those aspects of our activities that have significant environmental impacts and a bearing on quality.
- To review our objectives, KPIs and overall quality and environmental performance at the management review meetings.
- To communicate to our employees, customers and suppliers our policy and achievements in improving our environmental performance as well as the quality commitments we have made.

Dean Cossey

Managing Director
